

AGENCY FOR HEALTHCARE RESEARCH AND QUALITY

Working With Patient Safety Organizations (PSOs) – The Value for Hospitals During COVID-19 and Beyond

We will get started in just a few minutes.

Housekeeping

-  **All lines are currently muted.** We will have a Q&A period at the end of the presentation.
-  **Chat Function:** Use chat to ask a question.
-  **Recording:** This webinar **will be recorded.**

AGENCY FOR HEALTHCARE RESEARCH AND QUALITY

Working With Patient Safety Organizations (PSOs) – The Value for Hospitals During COVID-19 and Beyond

Welcome!

Speakers

- **Andrea Timashenka, J.D.**
 - ▶ Director, PSO Division, CQuIPS, AHRQ
 - ▶ andrea.timashenka@ahrq.hhs.gov
- **Terrie Van Buren, R.N., B.S.N., M.B.A., C.P.P.S.**
 - ▶ Vice President, Patient Safety Officer, CHS PSO, LLC
 - ▶ terrie_vanburen@chs.net
- **Janet Pue, D.P.T., N.C.S.**
 - ▶ PSO Coordinator, Carolinas Rehabilitation PSO
 - ▶ Equadr@atriumhealth.org

What does AHRQ's Patient Safety Organizations (PSO) Division do?

- Implements the [Patient Safety and Quality Improvement Act of 2005 \(PSQIA\)](#), including:
 - ▶ Certifying and [listing PSOs](#) (and “[de-listing](#)” PSOs, as applicable)
 - ▶ Developing [Common Formats](#)
 - ▶ Maintaining the [Network of Patient Safety Databases \(NPSD\)](#)

- Note: The HHS Office for Civil Rights enforces compliance with the confidentiality provisions of the PSQIA.

What is a Patient Safety Organization (PSO)?

- PSOs collect and analyze data voluntarily reported by healthcare providers to help improve patient safety and healthcare quality. PSOs provide feedback to healthcare providers aimed at promoting learning and preventing future patient safety events.
- Working with a PSO makes it possible for information from healthcare providers to receive certain **legal protections** and to be contributed to the Network of Patient Safety Databases (NPSD).

What is a Patient Safety Organization (PSO)?

- Many “flavors” of PSOs. They vary by:
 - Profit status
 - Scope (e.g., specialist or generalist)
 - Component or own entity
 - Other characteristics

What is a Patient Safety Organization (PSO)?

- AHRQ is not involved in the providers and PSOs' work together
- You determine with your chosen PSO(s) the scope of improvement activities that meets your organization's specific needs

Who works with PSOs?

Under the PSQIA's implementing regulation, providers include:

- **All types of individuals and entities** licensed or otherwise authorized under State law to provide health care services can work with a PSO.
 - ▶ For example: hospitals, nursing homes, pharmacies, physicians, nurse practitioners, etc.
- Also,
 - ▶ government organizations that deliver health care, and
 - ▶ parent organizations* of licensed provider entities and government organizations that deliver health care.

*See Patient Safety Rule at [42 C.F.R. §3.20](#) for definition of parent organization.

Who works with PSOs?

- According to a 2018 survey conducted by HHS' Office of the Inspector General (OIG), 59% of general acute-care hospitals participating in Medicare work with a PSO.
- The OIG found that among hospitals that work with a PSO:
 - ▶ **97% find it valuable**
 - ▶ **80% found the PSO's feedback and analysis helped prevent future patient safety events**

OIG Report: [*Patient Safety Organizations: Hospital Participation, Value, and Challenges*](#)

What is protected under the PSQIA?

- Information that meets the definition of “**patient safety work product**” (PSWP). It can be developed by the provider or PSO.
- The PSWP definition includes (but is not limited to):
 - ▶ Information (any data, reports, records, analyses, statements, etc.) that
 - Could improve patient safety, health care quality, or health care outcomes and which
 - The provider assembles or develops for reporting to a PSO and are reported to a PSO

What's the scope of the PSQIA protections for PSWP?

- The PSQIA provides **broad confidentiality and privilege protections** (inability to introduce the protected information in a legal proceeding).
- Benefits of the PSQIA protections:
 - ▶ **Nationwide and uniform.** Apply in all U.S. states and territories, and across state lines.
 - ▶ **Not limited to the peer review process.** Can apply to a wide range of patient safety activities.
 - ▶ **Allows for shared learning.** For example, a health care system can pool data and share experiences across facilities and clinicians.
 - ▶ **Backed by penalties.** The PSQIA imposes significant monetary penalties for violations of the confidentiality provisions.

Why start working with a PSO now?

- COVID-19

- ▶ Increased stress on healthcare systems
- ▶ Potential new patient safety issues

- PSOs can help!

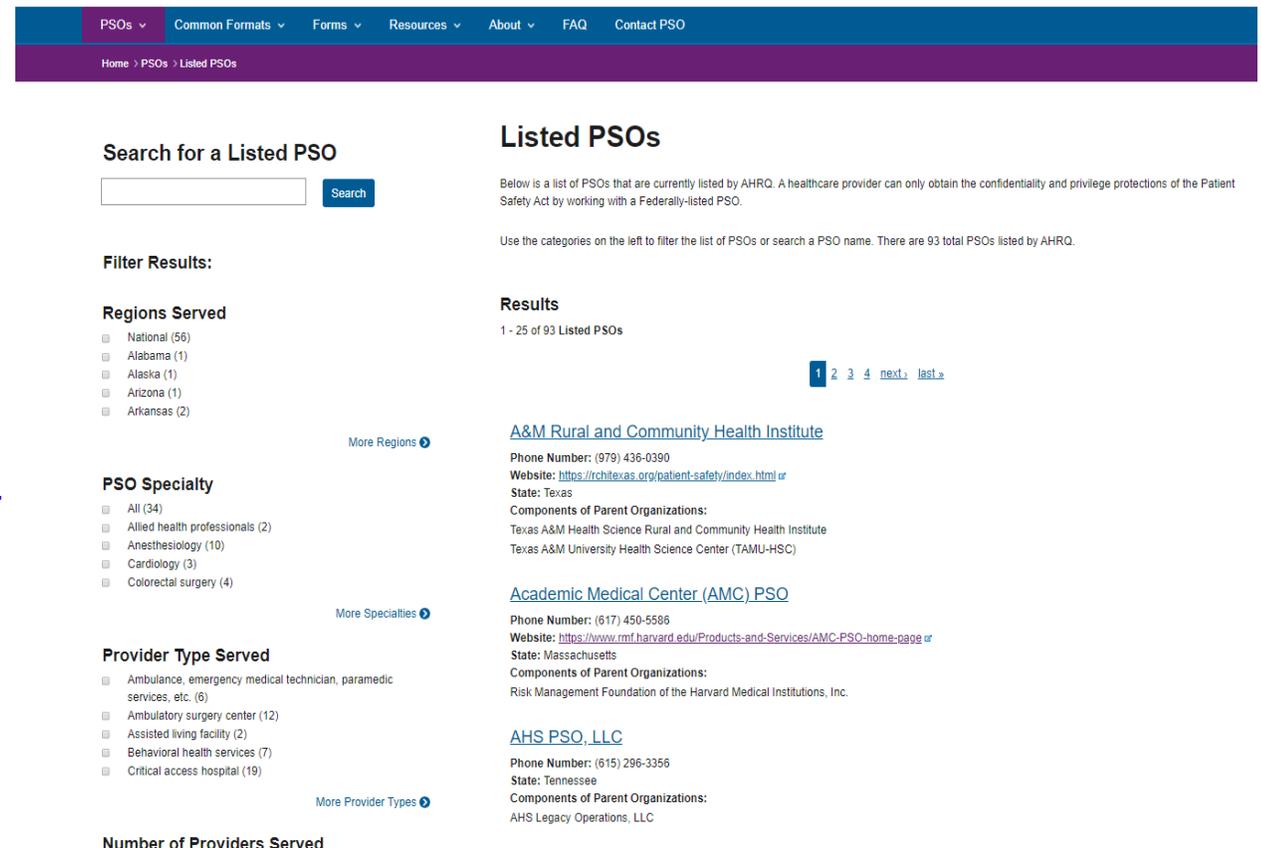

- ▶ **Reduce burden on your organization:** Use the PSO's expertise to analyze and aggregate patient safety data, and to develop customized approaches to improve quality and reduce adverse outcomes.
- ▶ **Increased data volume:** A PSO can identify and help your organization learn from rare and novel events, even before they happen to you.

Where Can I Learn More About PSOs?

- Visit the PSO website: <https://pso.ahrq.gov>, including:

- ▶ [Work With a PSO](#) section
- ▶ Resources, such as:
 - [Choosing a PSO Brochure](#)
 - [Working with a PSO: One Approach](#)
- ▶ [Listed PSOs](#) page

The screenshot displays the AHRQ PSO website interface. At the top, there is a navigation menu with links for PSOs, Common Formats, Forms, Resources, About, FAQ, and Contact PSO. Below the menu is a breadcrumb trail: Home > PSOs > Listed PSOs.

The main content area is divided into two columns. The left column contains a search bar for "Search for a Listed PSO" and a "Search" button. Below the search bar are filter sections:

- Filter Results:**
- Regions Served:** A list of checkboxes for National (56), Alabama (1), Alaska (1), Arizona (1), and Arkansas (2). A "More Regions" link is provided.
- PSO Specialty:** A list of checkboxes for All (34), Allied health professionals (2), Anesthesiology (10), Cardiology (3), and Colorectal surgery (4). A "More Specialties" link is provided.
- Provider Type Served:** A list of checkboxes for Ambulance, emergency medical technician, paramedic services, etc. (6), Ambulatory surgery center (12), Assisted living facility (2), Behavioral health services (7), and Critical access hospital (19). A "More Provider Types" link is provided.

The right column is titled "Listed PSOs" and includes a disclaimer: "Below is a list of PSOs that are currently listed by AHRQ. A healthcare provider can only obtain the confidentiality and privilege protections of the Patient Safety Act by working with a Federally-listed PSO." It also states: "Use the categories on the left to filter the list of PSOs or search a PSO name. There are 93 total PSOs listed by AHRQ."

Below the disclaimer is a "Results" section showing "1 - 25 of 93 Listed PSOs" with pagination links (1, 2, 3, 4, next, last). The first two results are:

- A&M Rural and Community Health Institute:** Phone Number: (979) 436-0390, Website: <https://rchitexas.org/patient-safety/index.html>, State: Texas, Components of Parent Organizations: Texas A&M Health Science Rural and Community Health Institute, Texas A&M University Health Science Center (TAMU-HSC).
- Academic Medical Center (AMC) PSO:** Phone Number: (617) 450-5506, Website: <https://www.mf.harvard.edu/Products-and-Services/AMC-PSO-home-page>, State: Massachusetts, Components of Parent Organizations: Risk Management Foundation of the Harvard Medical Institutions, Inc.

The second result is partially visible:

- AHS PSO, LLC:** Phone Number: (615) 296-3356, State: Tennessee, Components of Parent Organizations: AHS Legacy Operations, LLC.

At the bottom of the page, there is a section for "Number of Providers Served".

What if I still have questions?

- Contact us!
 - ▶ **Email:** PSO@ahrq.hhs.gov
 - ▶ **Telephone (toll free):** 866-403-3697
 - ▶ **Telephone (local):** 301-427-1111
 - ▶ **TTY (toll free):** 866-438-7231
 - ▶ **TTY (local):** 301-427-1130

CHS PSO, LLC.

*Terrie Van Buren, Vice President
Patient Safety Officer
CHS PSO, LLC*

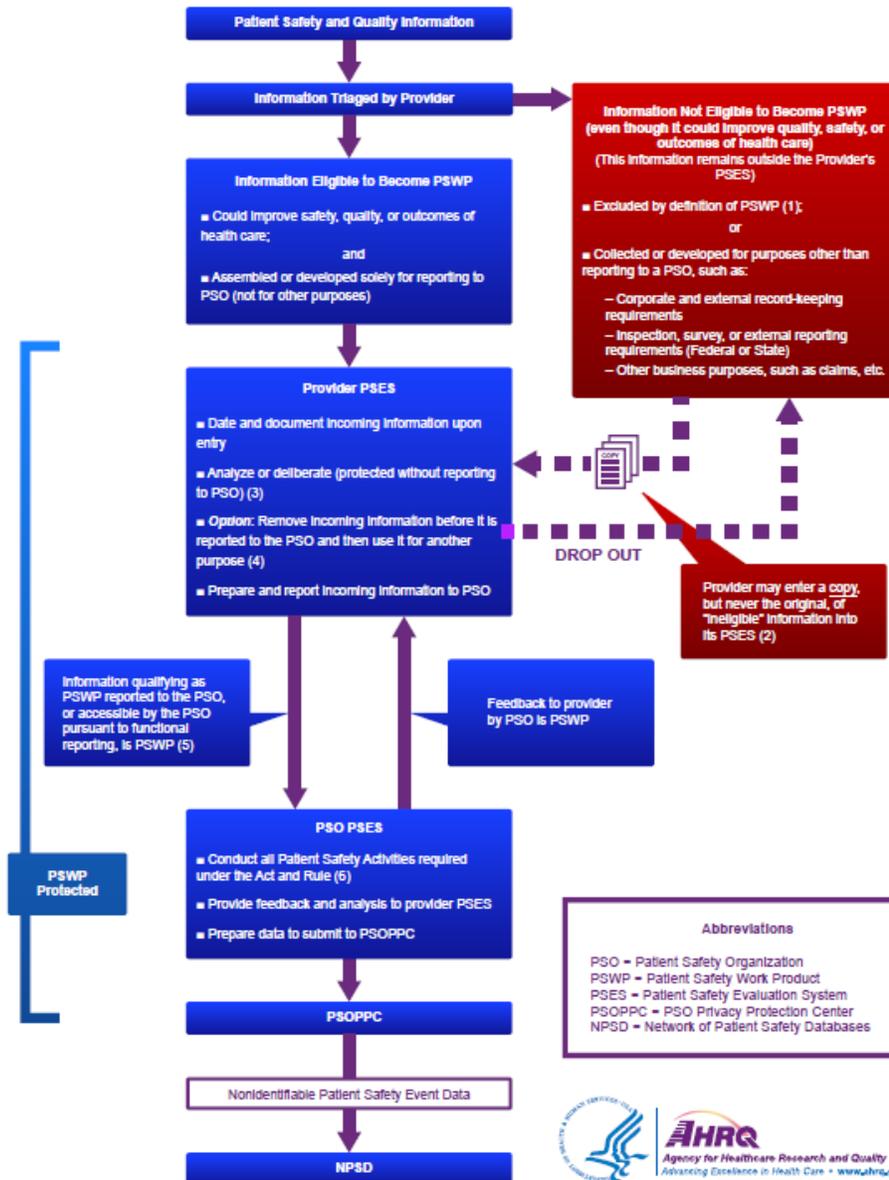

About the CHS PSO, LLC

- CHS PSO is a component PSO
 - As a component PSO, patient safety work product must remain separate from the rest of the parent organization.
 - We do share staff....
- AHRQ approved & officially listed CHS PSO, LLC effective 1/11/12 as a component PSO of CHS/Community Health Systems, Inc. Continued Listing 2015,2018, and 2021.
- Only CHS affiliated provider (including Physician Office Practice & ASC's) are members of the PSO as evidenced by executed membership agreements

How we became PSO

- Engaged outside counsel expertise
 - B. Page Gravely, Jr.
 - 804.967.9604 pgravely@hancockdaniel.com
- Determined operational structure, dedicated and shared staff (LLC, Board of Directors)
- Developed policies and procedures, workflow, both at the PSO and member provider levels
- Insourced and developed IT platform for our Patient Safety Evaluation System – security/confidentiality (6 months)
- Executed member provider agreements and leader confidentiality agreements
- Hosted webinars for member providers to orient them to the CHS PSO, member and PSO responsibilities, PSQIA Act protections, confidentiality provisions, policies, quarterly attestations, flow of patient safety work product
- Organized and chartered quarterly Patient Safety and Medication Safety Councils of subject matter experts, CHS PSO and member staff
 - Review current issues in our industry, trends, issues, common causes
 - Prioritize and focus patient safety and quality efforts
 - IT platform opportunities for improvement
 - Dissemination of alerts, lessons learned, education

Working With a PSO: One Approach

See Handout

PSO Activities

- Efforts to improve patient safety and quality of health care delivery
- Collection and analysis of patient safety work product (PSWP)
- Operates a patient safety evaluation system (PSES) with feedback to participants
- Member/PSO operating policies and procedures which define roles at each provider to submit and receive PSWP, confidentiality and privilege, and ‘How to report to PSO (SBAR format)’:
 - **Event Reporting (Safety Event/Sentinel event)**
 - **Patient Safety Plan**
 - **Root Cause Analysis**
 - **Confidentiality and Privilege of PSWP**
 - **PSWP Security Policies and Procedures**
 - **Responding to Requests for PSWP**
 - **CHS PSO Hospital Operating Policy and Procedure**

PSO Activities

- Monthly, department specific, annual Comprehensive Risk Assessment
 - lessons learned from past events and ISMP recommendations high-alerts
- Quarterly CHS PSO, LLC Orientation- virtual workshop (2 hours)
- Standardized RCAs
 - Quarterly Cause Analysis virtual workshops (Press Ganey/HPI model) approx. 3500 have taken this course since 2014
- Bimonthly, anonymous Safety Event “Coaching Call” - “Safe Tables” – moderated by CHS PSO staff
- Online, web-based education on key Patient Safety topics
- Education and support of Highly Reliable Organization journey
- Development and dissemination of information regarding patient safety, such as recommendations, protocols, or information regarding best practices
 - a. SBAR Safety Alerts
 - b. Patient Safety Communication (designated to/from)
 - c. Patient Safety Alerts
 - d. Guidance Re: Sentinel Event Alerts, ISMP, etc.
 - e. Quarterly, comparative analysis reports by region in the PSES (APD rates)

Patient Safety Alerts – COVID-19 Pandemic

Patient Safety Alert

TO: CEOs, CNOs, CQOs, and Risk Managers
CC: Regional Presidents
FROM: CHS PSO, LLC
DATE: 6.2020
RE: Issue 22-6.2020 Reopening Ready and Patient Safety

The purpose of this Patient Safety Alert is to share common causes for recent SSEs related to the COVID-19 pandemic and reopening efforts and to initiate preventative strategies to guard against deviations in 'safety critical' policies and procedures.

COVID-19 Results

!Safety Alert: Managing Alcohol Withdrawal!

Situation	Physiologic falls with serious injuries have been reported to the CHS PSO, LLC involving patients who are exhibiting acute alcohol withdrawal symptoms in non-behavioral health acute care settings.
Background	According to the Substance Abuse and Mental Health Services Administration (SAMHSA), the COVID-19 Epidemic has created countless primary and secondary challenges for those delivering care to our most vulnerable populations. An additional concern has arisen for those with an alcohol use disorder, benzodiazepine use disorder, or other condition that increases the risk of seizures ¹ . According to the CDC, stress during an infectious disease outbreak can result in an increased use of alcohol , tobacco , or other drugs ² .

!Safety Alert: Medication Errors Remdesivir!

Situation	There have been medication variance events reported to the CHS PSO, LLC related to delayed and omitted doses of Veklury® (remdesivir) to treat patients with coronavirus disease (COVID-19).
Background	The U.S. Food and Drug Administration (FDA) has issued an Emergency Use Authorization (EUA) to permit the emergency use of the unapproved product Veklury® (remdesivir) for treatment of suspected or laboratory confirmed coronavirus disease 2019 (COVID-19) in hospitalized adult and pediatric patients. Storage: After reconstitution and dilution, bags of remdesivir can be stored up to <u>4 hours at room temperature</u> (20°C to 25°C [68°F to 77°F]) or <u>24 hours at refrigerated temperature</u> (2°C to 8°C [36°F to 46°F]) prior to administration. Events reported include having to discard/waste remdesivir for a patient with delayed IV access as nurse was unaware remdesivir expires after 4 hours as well as nurses unable to locate remdesivir, which may be stored in refrigerator overnight. The costly remdesivir regimen consists of a loading dose followed by 4 daily doses. Compatibility with IV solutions and medications other than 0.9% sodium chloride is not known.

Committed to Quality and Safety

By leveraging techniques from high-risk industries such as nuclear power and aviation, CHS is creating inherently safe hospital environments for patients and staff.

Atrium Health

What does EQUADRSM Provide?

Facility-level data reported

- Quarterly
- Monthly
- Secure web portal

Data from all participating facilities is aggregated

- Compare performance against EQUADRSM members
- Comparison Groups: Acuity, Size, IRF/IRU

Quarterly conference calls/Safe Tables

- General webinar and Infection Prevention/Pediatric webinar (8 Total)
- Review data/trends
- Share best practices and discuss challenges

EQUADRSM Data Collection

Membership Guide and Data Specifications

- Definitions and specifications for each measure
- Instructions and deadlines for reporting process
- Measures reviewed annually at Measurement Consensus Work Groups

EQUADRSM Advisory Council

- Established Jan 2016
- Comprised of representatives from EQUADRSM members
- Includes permanent seats and rotating seats
- Provide a member's perspective on matters related to strategic growth and development

EQUADRSM Web Portal

Comparison Groups

Each Quarter, facilities may compare their results to 4 Comparison Groups:

- **Acuity** = facilities of similar acuity based on average CMI
- **Size** = facilities of similar size based on average daily census
- **Facility Type** = similar type facilities, i.e. free standing (IRF) vs inpatient rehab units (IRU)
- **ALL** = overall EQUADRSM aggregate rates of our entire membership.

Acuity: Tier 2
Size: Tier 3

	Q3 2019					YTD 2019		Q3 Low ALL	Q3 High ALL
	Acuity Tier2	Size Tier3	IRF	GH	ALL	GH	ALL		
Discharges to Acute Care									
Number of patients discharged to acute care "early"	119	122	221	12	251	55	683		
Number of patients discharged to acute care "late"	451	528	815	70	979	225	2729		
Number of patients whose discharge to acute was planned	41	77	94	8	100	15	255		
Total number of discharges reported for this metric	5470	5362	8228	815	10560	2581	31064		
Discharges to Acute Care - Early (% of total discharges)	2.18%	2.28%	2.69%	2.02%	2.38%	1.88%	2.20%	0.00%	10.43%
Discharges to Acute Care - Late (% of total discharges)	8.24%	9.85%	9.91%	8.68%	9.27%	8.96%	8.79%	2.31%	24.55%

- COVID-19 Experience
- Flexibility and Teamwork in the age of COVID
- Reduction in Catheter-Associated Urinary Tract Infections (CAUTIs)

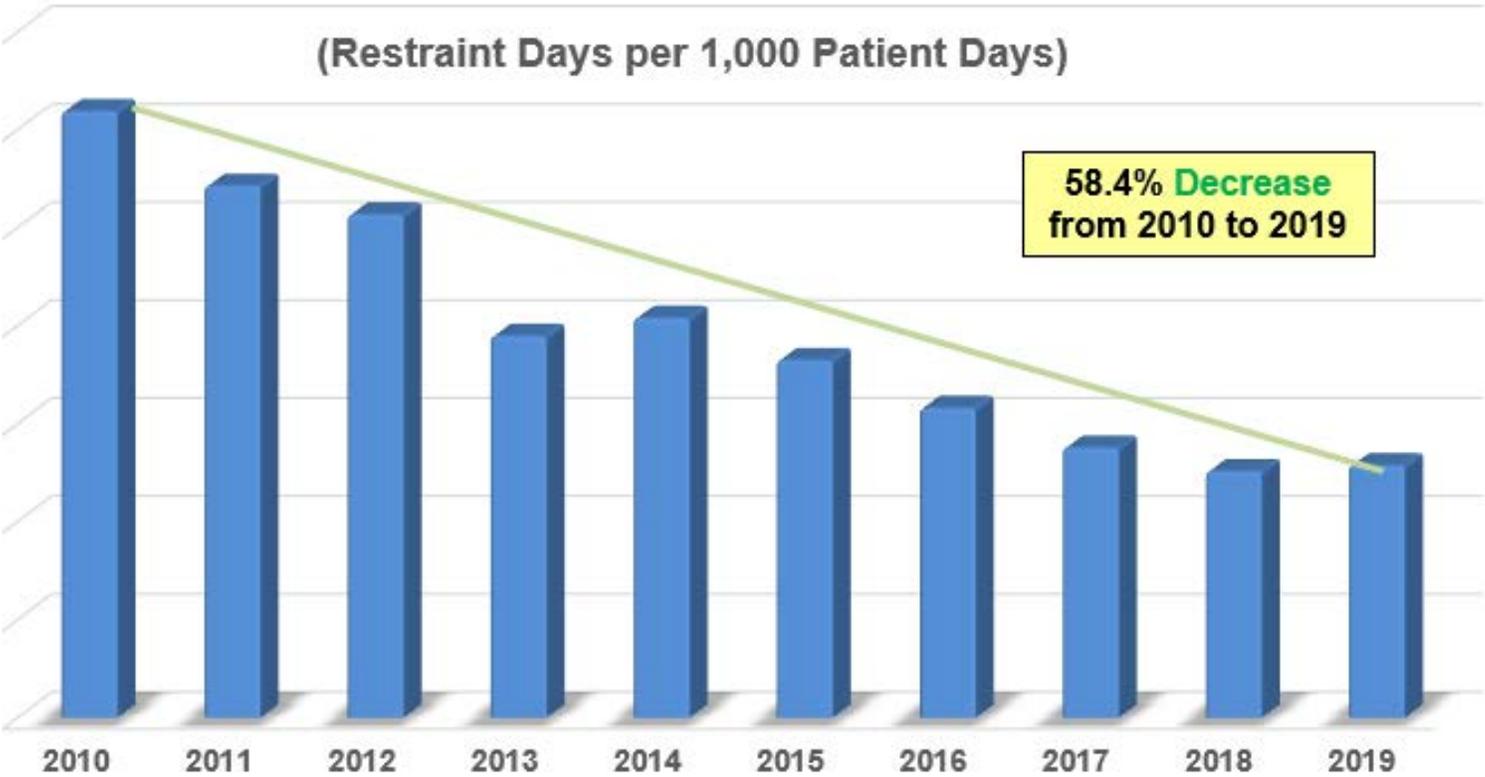

EQUADRSM COVID-19 Webinars

- What are you seeing? What do these patients look like?
- Setting up separate units (staff, gym space)
- Adapting equipment
- Visitor restrictions
- Criteria for moving patients off a COVID unit
- Redeployment opportunities
- Clearance for patients to go to rehab, SNF, dialysis
- Patients experiencing isolation depression
- Use of virtual family training
- CMS waivers
- Re-entry measures
- Teammate appreciation and engagement

Restraint Utilization

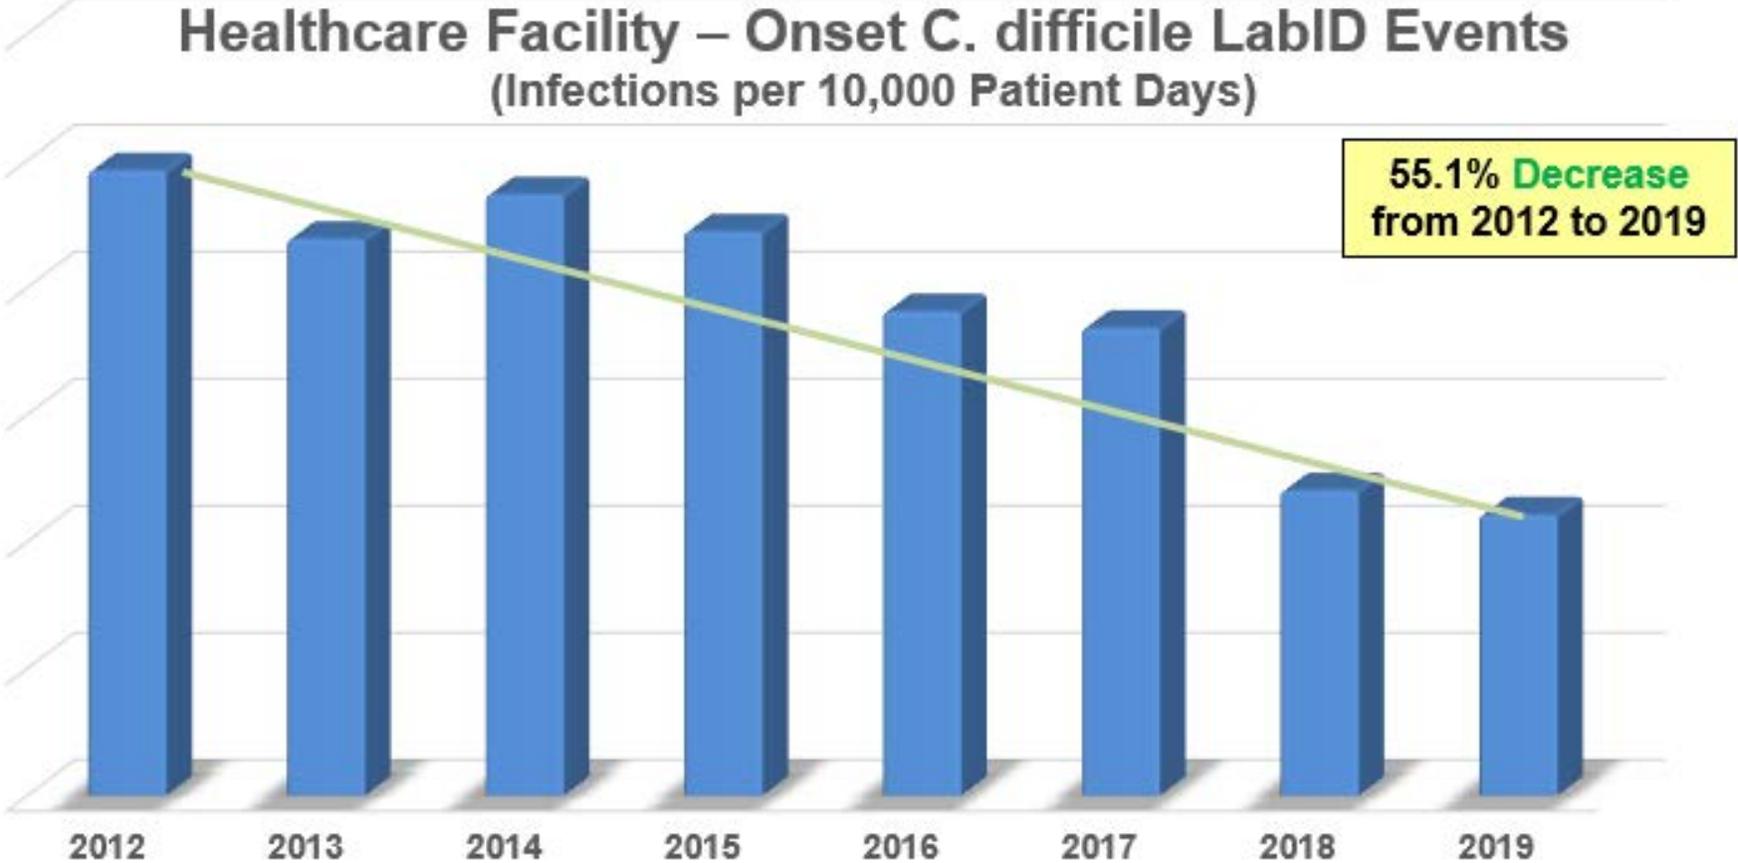

Unassisted Falls

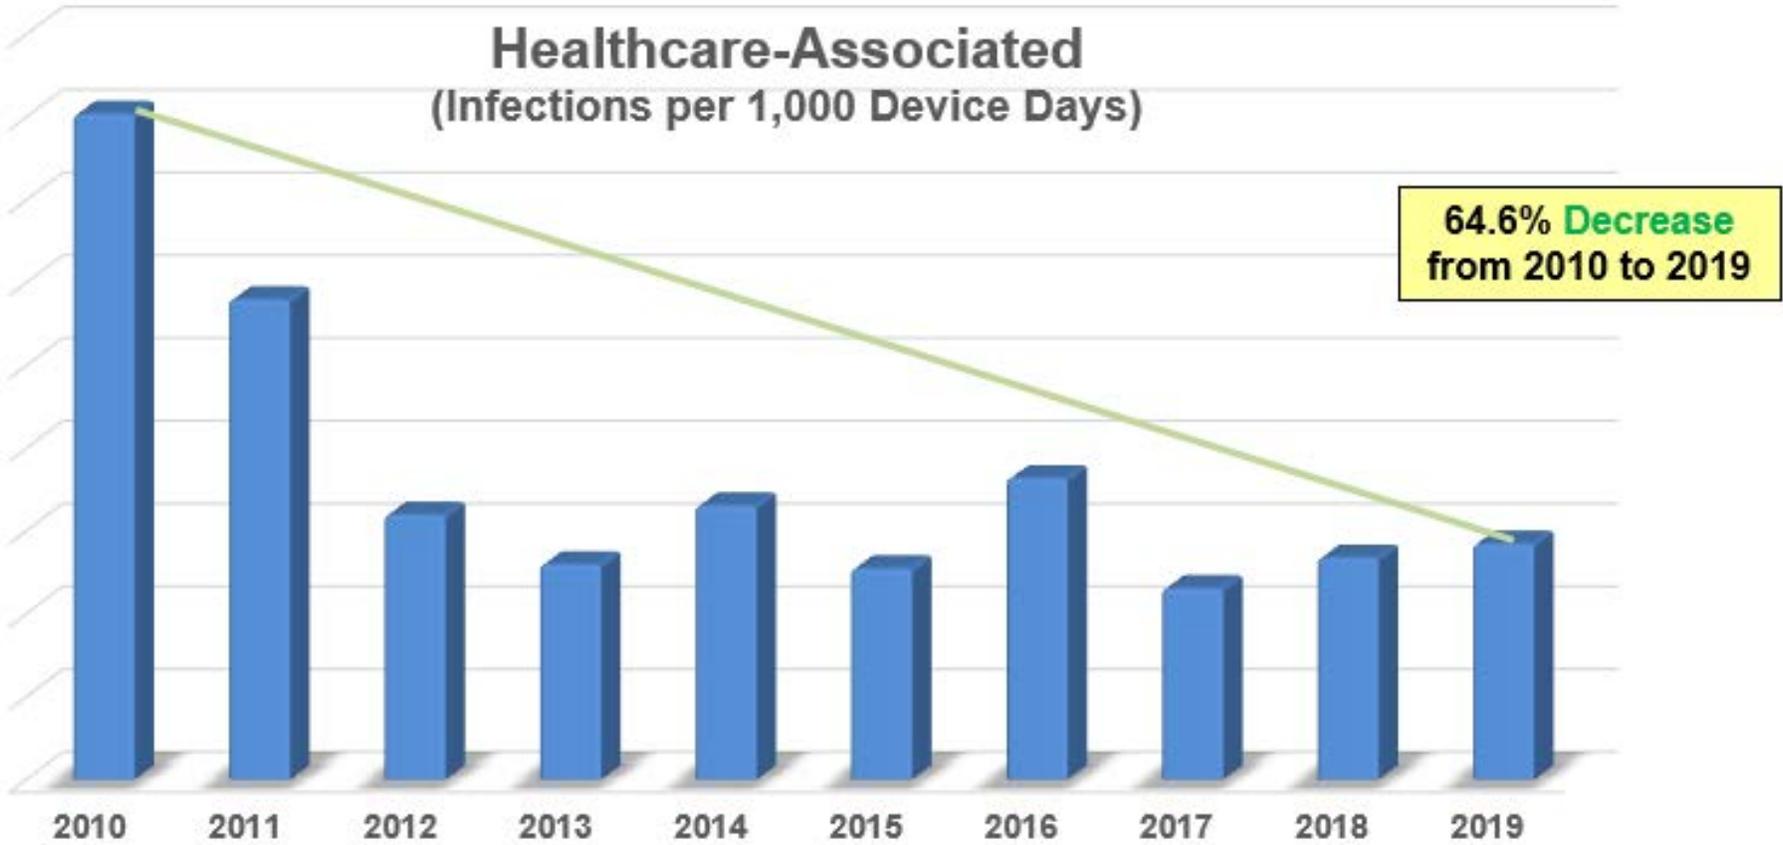

MRSA Bacteremia LabID Events

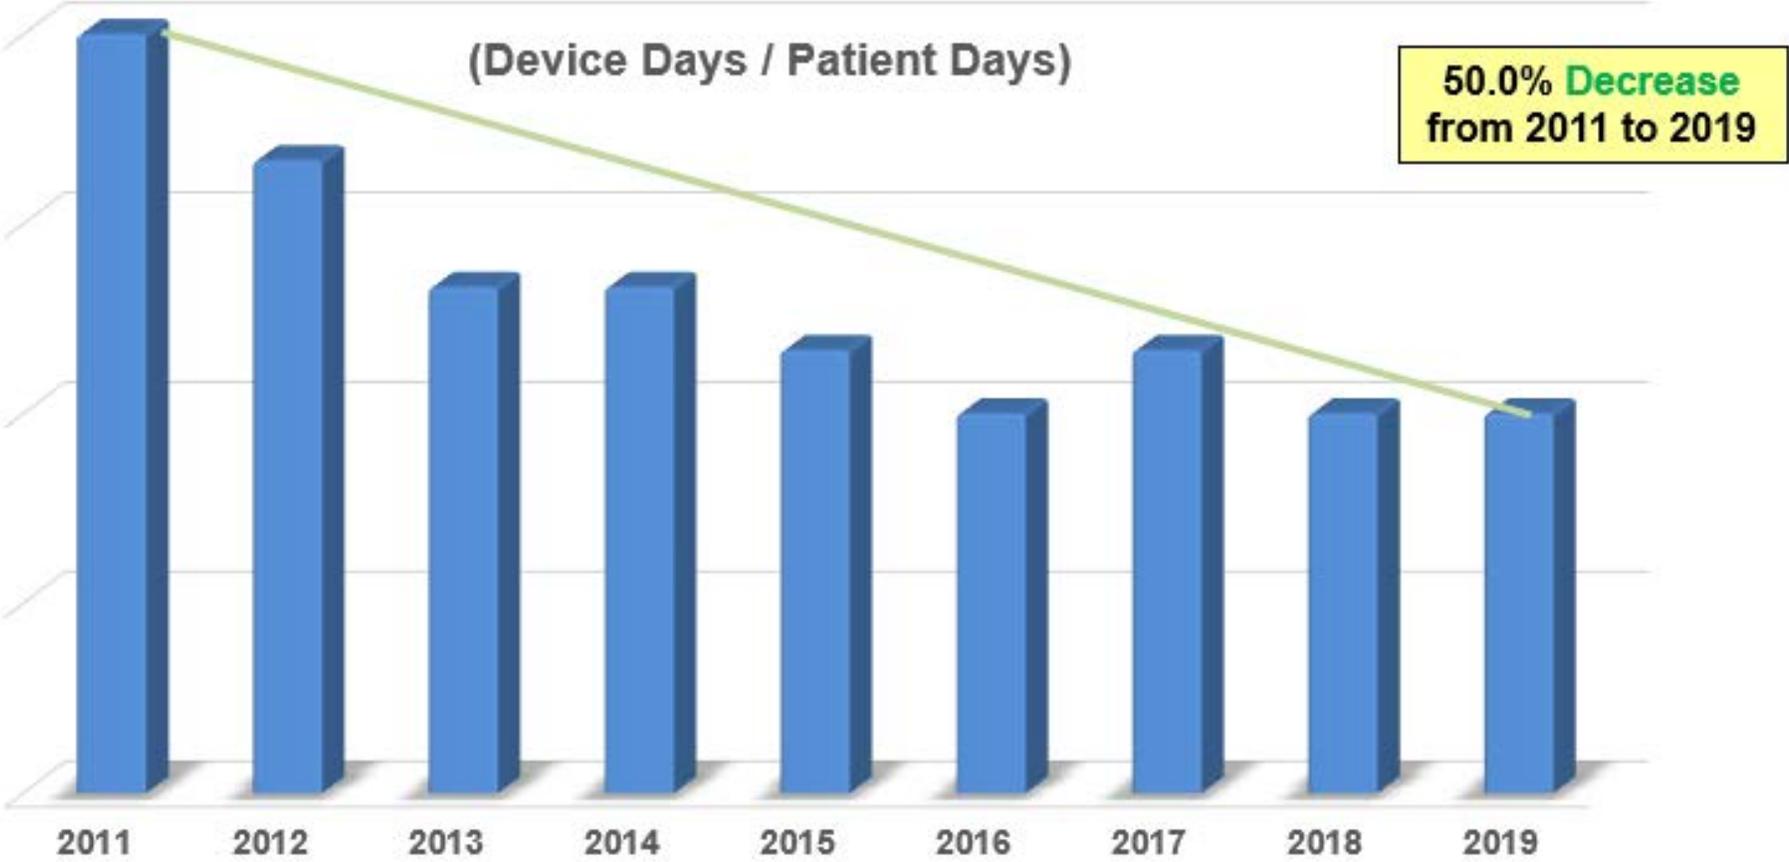

C. difficile LabID Events

Catheter-Associated Urinary Tract Infections

Urinary Catheter Utilization Ratio

EQUADRSM Cost Savings 2010 to 2019

EQUADR SM Adverse Event	Events Averted (rounded)	Cost Per Event 2010/2014	Overall Cost Savings
MRSA	195	\$1,580	\$308,074
CAUTI	307	\$1,000 / \$13,793	\$1,590,784
C. difficile	229	\$9,600 / \$17,260	\$3,641,305
Unassisted Falls w/injury	171	\$7,234 / \$6,694	\$1,151,982
Pressure Ulcer	247	\$17,000 / \$14,506	\$3,780,804
VTE	120	\$8,000 / \$17,367	\$1,840,217
TOTAL	1270		\$12,313,166

2019 AHA Quest For Quality Prize

Value of Sharing Through a PSO

- Sharing of processes and outcomes
 - Reduces individual facility “trial and error”
 - Develops understanding of industry averages, as well as reasonable expectations for improvement
 - Rapid dissemination of best practices across the industry
- Move from a culture of reporting to one of performance
 - Reporting is a must
 - Utilize the data that you must report to gain value from other’s performance and experience

Value of Sharing Through a PSO

- Justifies the importance and uniqueness of inpatient rehabilitation in the care continuum
- Provides a “safety zone” to discuss sensitive issues such as falls and restraint use
- Sense of community – “We’re not alone!”

Leading Quality and Safety

“Success teaches us nothing; only failure teaches...Develop the capacity to learn from experience.”

- Admiral Hyman G. Rickover
